

RESEARCH INTERNSHIP

IHMC is seeking individuals to assist with data collection across a variety of Healthspan, Resilience, and Performance (HRP) research protocols. These protocols are funded from a variety of resource sponsors; current projects are related to the enhancement of human performance in extreme military environments, advancements in Aerospace and beyond. Ongoing research efforts involve studies in the areas of exercise science, biology, nutrition, life science, data science, and experimental psychology.

This opportunity is perfect for students interested in building a strong resume through real-world research and development experience at a world class institution as well as the potential opportunity to earn credit hours through your university.

Responsibilities

- Provide support for day-to-day execution of research protocols
- Conduct literature reviews to facilitate sound methodology
- Aid in the recruiting and scheduling of research participants
- Provide support for data preparation, reduction, and analysis
- Provide support for the preparation of research reports, refereed presentations, and publications
- Execute other duties in support of the aforementioned research and development activities

Minimum Requirements

- ✓ 3.0 GPA undergraduate students
- ✓ 3.5 GPA graduate students
- ✓ Junior, Senior, or Master's student
